CONVENTION PROGRAM

The Los Angeles 1980 AIO Convention Committee takes great pride in presenting this brochure to the organ building community and extends a warm invitation to you and your family to join us in October for an exciting program of events.

We would like to take this opportunity to thank our advertisers and exhibitors who provide avenues of idea exchange and product evaluation and without whose financial support this convention would not be possible. Exhibitors with reserved spaces at the time of this printing are listed below and a Directory of Advertisers can be found on page 32. Special thanks to those who have sponsored coffee breaks and receptions. We acknowledge their generous support.

To all of you fortunate enough to be able to attend the convention, we wish you the best for an enjoyable and stimulating experience.

REGISTRATION INFORMATION

TIME: The convention activities cover a period of five days from Saturday, October 4, 1980 (for those planning to take the exams for Master’s and Journeymen’s Certificates) until the evening of Wednesday, October 8, 1980. The main convention begins with registration on Sunday afternoon at 12:00 noon on October 5, 1980 at the Miramar-Sheraton Hotel.

PLACE: All sessions of the convention will take place in the Miramar-Sheraton Hotel located at 1133 Ocean Avenue in Santa Monica, California. Field trips by bus leaving the hotel are as noted in this program. Your reservation card (enclosed) must be mailed early enough to reach the hotel not later than September 21, 1980.

COST: AIO members attending convention sessions will be charged a fee of $130 or $45 for a single day or part thereof. Family or “non-organ connected” guest accompanying those attending will not be required to register or pay fees. However, the family member or guest who wishes to participate in the San Gabriel Mission tour, dinner at Panchito’s Mexican Restaurant followed by the George Wright concert on Tuesday, October 7, must register and pay for the entire single day of Tuesday. If spouse or children wish to attend all convention sessions, an $80 registration fee must be paid. If non-registrants wish to attend the closing banquet, the charge will be $20. Non-members will be charged $160 each or $55 for a single day or part thereof. Hotel charges are paid separately, and special convention rates are $48/day for singles and $56/day for doubles. Make your reservation on the card previously mailed to you to obtain these rates.

MEALS: Your registration fee includes lunch and dinner on Monday, Tuesday, and Wednesday. Dinner on Sunday evening and breakfast each morning are not provided. A list of recommended restaurants and coffee shops within walking distance of the hotel will be available at the hospitality table.

TRANSPORTATION: The Santa Monica Flight Line vans (393-9231) are available at 90 minute intervals in front of each terminal at Los Angeles International Airport to transport you to the Hotel on weekends. These vans run on 60 minute intervals during weekdays. The cost is $6 one way or $10 for an arriving and departing coupon. If the convention committee knows in advance that there would be a large number of registrants arriving near the same time, a charter van could be utilized for a far cheaper rate per person. An area on your registration form is provided for you to supply this information if you so desire.

MANAGEMENT: The 1980 Convention of the AIO is an official activity of the AIO, and is being managed solely by a Convention Committee co-chaired by Larry Abbott and Pete Sieker. Inquiries about the convention can be made to them at 2027 Pontius Avenue, Los Angeles, California 90025. Interested exhibitors should contact Rick Wild, 10678 Drakewood Avenue, Culver City, California 90230.

CONVENTION PHOTOGRAPHS: Photographs of the convention activities and personalities will be taken by Kevin E. Gilchrist and prints can be ordered by filling out order blanks which will be available prior to the closing banquet. Every effort will be made to have proof sheets for selection purposes.
PRE-CONVENTION SCHEDULE

Saturday, October 4

1:00 P.M. AIO Examinations for Journeymen and Master Organbuilder, Specialists (Pipemaking, Voicing, Service, etc.) Examiners will be Pete Sieker, Piet Visser, and Randy Wagner. Exams administered at Abbott and Sieker shop, 2027 Pontius Avenue, West Los Angeles. Exam candidates should notify Pete Sieker after arrival in Los Angeles: (213) 473-2058.

To be eligible for the exams, an individual must be an AIO member for one year and notify examiners 90 days before exams. The next exams will be in September 1981 at the Cleveland Convention.

2:00 P.M. ORGAN CRAWLS—Your Choice
Crawl No. 1—Santa Monica, transportation by local members
2:00 First Church, Christ Scientist, Abbott & Sieker Opus 5, 1964, pitman action; Rick Wild demonstrating
2:45 St. Paul's Lutheran Church, Abbott & Sieker Opus 62, 1973 tracker; Rick Wild demonstrating
3:30 Larry Abbott entertainment organ; Larry Abbott demonstrating
4:15 Lee Burns residence, Ahrend & Brunzuma tracker, 1967

Crawl No. 2—Hollywood, Beverly Hills, transportation by Richard Warne
2:00 Hollywood Methodist Church, Casavant 1930, rebuilt and enlarged by Richard Warne who will be demonstrating
3:30 Rosales Organbuilders, Inc. Shop Tour
4:00 1st Congregational Church, Los Angeles, Skinner-Schlicker 1928-1969, 217 ranks; Lloyd Holzgraf, organist, demonstrating
5:15 Chapel of All Saints' Episcopal Church, Beverly Hills, Abbott & Sieker electro-pneumatic Opus 40, 1969; Thomas Foster, Organist-Choirmaster, demonstrating

Crawl No. 3—Westwood, transportation by local members
2:00 UCLA Schoenberg Hall, Hradetzky tracker; Dr. Thomas Harmon, University Organist, demonstrating
3:15 University Lutheran Chapel, Abbott & Sieker Opus 15, 1965, pitman action; Oscar Street demonstrating
4:00 Westwood Village Lutheran Church, Banzhaf tracker Opus 1, 1979; Rick Wild demonstrating
4:45 Mount St. Mary's College, Janke tracker owned by David Britton, who will demonstrate
5:40 Greg Harrold shop tour

6:00 Organ Crawls Return to Hotel — Cocktails & Refreshments, Cash Bar Dinner-on-your-own (recommended restaurants on page 26)

8:00 Slide-Tape presentation by David J. Billeter: “Organ Building in the Alpine Countries”
A splendid collection of slides will be shown via a dual projection system. Assembled from eight trips to Switzerland, Austria, and southern Germany, the presentation will feature new and historic organs by several builders including Matthys, Silberman, Gabler, Kuhn, Metzler and Muri. Taped examples of the major instruments will accompany the slides. Mr. Billeter is Organist-Choirmaster of St. Mark's Episcopal Church in Altadena, California.
Monday, October 6

8:00 A.M.  Exhibits Open, Registration Desk Open

8:30  Official Opening & Greeting by President Jack Sievert
Welcome & Opening Prayer: The Reverend A. E. Fenton, Rector,
Saint Matthew’s Episcopal Church, Pacific Palisades

8:45  Lecture: Dr. Robert E. Coleberd
"Selected Topics in the Economics of Pipe Organ Building"
   1. Pipe Organ Imports—A New Theory
   2. Organbuilding and the Performing Arts—Some Important
      Parallels
   3. Outlook for the 80’s—Demographic, Economic and Public
      Policy Influences on Pipe Organ Demand

9:45  Coffee Break courtesy of James Pressler—Exhibits Open

10:00  Lecture—Charles B. Fisk
"The design of the House of Hope organ:
An historic approach towards an eclectic result"

11:00  AIO Business Meeting—Exhibits Open

12:00 Noon  Lunch in the Hotel

1:15 P.M.  Lecture—Arthur Lawrence
"Console Controls"
Console design, both tracker and electro-pneumatic from the player’s
standpoint.
Panel Discussion on “Console Controls”
Charles Fisk, Arthur Lawrence, Orpha Ochse; Jack Sievert, Moderator

2:45  Refreshments courtesy of Solid State Logic

3:00  Lecture—Jim Lewis and Manuel J. Rosales
"Early California Organs and Builders"

Mr. Rosales will present an overview of organs built in and for California from
the late 19th Century to the present with an emphasis on work of the Murray M.
Harris—Los Angeles Art Organ Co. A packet of technical data will be distributed and
discussed. The presentation will be enhanced by photographs and illustrations from
Mr. Lewis’ extensive collection.

4:00  AIO Business Meeting

5:00  Exhibits Open
6:45  Walk to St. Augustine by-the-Sea Episcopal Church
      1227 Fourth Street, Santa Monica

7:00  AIO-AGO Dinner with Los Angeles and Pasadena chapters
      Wine and Hors d’oeuvres courtesy of Klann, Inc.

8:00  After-Dinner Talk—Arthur Lawrence
      “Aims of the AIO”

8:30  Early Consort Music by The Guidonian Hand, Ken Herman, Director
      The Guidonian Hand is a San Diego based ensemble founded in 1974. The group
      specializes in the performance of Italian early baroque, Elizabethan, and Italian
      16th century vocal and instrumental music. Instruments used will include organ,
      organetto, positiv, regal, harpsichord and other early instruments.

10:00 Walk back to Hotel
CONVENTION PERSONALITIES

Dr. Coleberd is Manager of Corporate Development Economics for Tosco Corporation, a diversified energy company headquartered in Century City, Los Angeles. He is a former consultant to APOBA, a member of the Organ Historical Society, and an amateur organ builder. His lecture at the 1977 AIO Convention in Pittsburgh was reprinted in The Diapason (May 1978). He will present the initial results of a “custom built” econometric forecasting model especially “scaled” for the pipe organ industry.

Robert E. Coleberd

The president of C. B. Fisk, Inc., Mr. Fisk has been an independent organ builder for 25 years. After receiving an A.B. degree in physics from Harvard College, he did graduate work at Stanford University in physics and music. He worked with John Swinford in California, apprenticed with Walter Holtkamp and became partner and president of The Andover Organ Company. In 1961, he moved to Gloucester, Massachusetts and founded the present company. Fisk has been building tracker instruments since 1959. Notable organs have been King’s Chapel, Boston, 1963, Harvard University, 1967 and House of Hope Presbyterian Church in St. Paul, Minnesota, 1979. House of Hope is the largest tracker-action organ (63 stops, 98 ranks) to be built in this country in this century.

Charles B. Fisk

Mr. Lawrence has served as Editor of The Diapason, an international organ-harpsichord journal, since 1976, and as its publisher since 1979. Formerly a faculty member at the Centre College of Kentucky and at the University of Notre Dame, he is now on the faculty of Saint Mary’s College, Notre Dame, Indiana, and has been since 1969. Lawrence received the M.M. degree in music theory from Florida State University, the A.M.L.S. degree in music librarianship from the University of Michigan, and D.M.A. degree from Stanford. He will be included in the forthcoming edition of “Who’s Who in the Midwest.”

Arthur Lawrence

Mr. Lewis, a native of Los Angeles, received his Bachelor of Art degree from Art Center College of Design in Los Angeles. He has been a commercial and industrial photographer and is presently an Instructor of Commercial Photography at Los Angeles Trade Technical College. An accomplished organist and an avid organ historian, his collection of organ photographs is vast and varied. (not pictured)
Dr. Ochse is professor of Music and College Organist at Whittier College, Whittier, California. Her activities in the organ profession have included two European recital tours, published organ compositions, and research studies in organ performance ability and tonal design of early European organs. She received the Master of Music and Doctor of Philosophy degrees from the Eastman School of Music, Rochester, New York. She is on the National Council of the American Guild of Organists. Her book, *The History of the Organ in the United States*, is published by Indiana University Press.

Mr. Rosales has restored and has been active in the preservation of 19th-and turn-of-the-century American organs in Southern California for over a decade. A native of New York, he attended Immaculate Heart College in Los Angeles and in 1969 joined the Schlicker Organ Co., where he apprenticed with emphasis on voicing and tonal finishing. In 1972, he returned to Los Angeles and founded his own firm, specializing in new and restored mechanical action organs. Mr. Rosales is a founder of the Pacific Southwest Chapter of the Organ Historical Society and is active in the analysis and documentation of extant instruments.

Tuesday, October 7

8:00 A.M.    Exhibits Open, Registration Desk Open

9:00       Buses depart for Long Beach, Los Altos Methodist Church

9:45       Lecture—Dr. Orpha Ochse
          "Notes on the American Organ"
          Sometimes beneficiary, sometimes victim of ingenuity and experimentation, the organ
          includes a fascinating array of personalities and situations in its history. Dr. Ochse
          explores the circumstances surrounding some of the major developments in American
          organ history, and the relationship of those developments to organ performance.

11:00       Coffee break courtesy of Rosales Organ Builders, Inc.

11:15       Demonstration of Wm. B.D. Simmons Tracker, 1852
          Rebuilt Rosales & Associates 1975-1978

A survivor of the San Francisco 1906 Earthquake, the Sim-
mons now resides in its third home, having had only minor
mechanical alterations and twice redecorated case and
facade pipes when acquired in 1975 with the help of the
Organ Clearing House. The major points of rebuilding are
retabled windchests, double rise bellows recovered, all
interior components cleaned and/or refinshed, new pedal
organ built, swell bass enlarged, short registers extended,
original appearance of key desk restored and the casework
and front pipes redecorated. New and replacement metal
flue pipes were custom made in the original style by Organ
Supply Industries, Inc. and the new reed bass extensions
were made in the Rosales shop.

George Wright in Concert
San Gabriel Auditorium Wurlitzer

George Wright is probably the best known name in the field of popular organ playing since the late Jesse Crawford. He has produced close to forty records; several of which have sold over a million copies. The Wright style is soundly based on a firm classical foundation. His classical training in piano came from Benjamin Moore in San Francisco and his organ instructors included Wallace Sabin and Irene Robertson. For three years, George Wright has appeared as regular organ soloist at the Fox Theater in San Francisco and at the Paramount Theater on Times Square for a like period. He is currently installing a large four-manual Wurlitzer organ in his Los Angeles home.

The San Gabriel Auditorium Wurlitzer was built in 1924 for the Albee Theatre, Brooklyn, and was designated as a Style 260 Special, three manuals, 16 ranks. Special features included an Echo Vox Humana, Wurlitzer Piano, and a 32’ Diaphone. The organ was donated by the theatre owners to the City of San Gabriel in 1968 through the efforts of the Los Angeles Chapter of the American Theatre Organ Society, whose members dismantled, packed, reconditioned and reinstalled the organ. The original 32’ Diaphone was unavailable, but a replacement was found. Mr. Wright suggests the general vicinity of Row M for best tonal balance. The tonal resources are as follows, with unification in the typical “Unit Orchestra” fashion providing a large number of stops:

<table>
<thead>
<tr>
<th>Main (Left) Chamber</th>

RING TERMINAL
Many builders in the U.S. are now building mechanical instruments, and are forced to look to European sources for most small parts. We need not detail the disadvantages of this necessity to anyone who has ordered from a European source! In keeping with the changing needs, Reisner has already begun to offer some parts suitable for use in mechanical action instruments, particularly our new “Ring Terminal”. This very important part as made by Reisner has four distinct advantages over the several European “equivalents”:

1. Smaller diameter—fits in tight places such as widely-fanned backfalls and compact roller-boards;
2. Headless set-screw—does not hang on adjacent close actions;
3. Socket-head set-screw—allows the ring to be held on the tip of a long allen-wrench for insertion deep into complex actions where fingers will not go!
4. AVAILABLE NOW FROM REISNER—no customs—no busted packages spilling your parts across the Atlantic—courteous AMERICAN service and business-practices!

AN AMERICAN MANUFACTURING COMPANY
240 N. Prospect Street
Hagerstown, Maryland 21740
(301) 733-2650

The Best In

COMBINATION SYSTEMS—
New Features:
- Self-contained stop magnet supply—will not load organ rectifier.
- Self-contained small battery—will power memory IC for years.
- Dual 16 piston memory on each division.
- Expandable to any size.
- Adjustable piston delay time—prevents accidental operation.

CONSOLES
- 3 and 4 manuals
- Wurlitzer theater style replicas
- Will hold up to 315 stop keys
- Designed for Reisner or Devtronix magnetic stop switches

32”—16’ PEDAL TONE GENERATORS
- Up to 4 voices
- 32 Notes

SEND FOR FULL INFORMATION.
Why pay premium prices for unreliability when you can satisfy your customers with “Rolls Royce” components from PIPECRAFT

Fine artisans to the organ building profession

Specifications: “with the mark of incomparable excellence”

Consoles

KEYBOARDS — • Custom designed for each console. Keys and keybed from kiln-dried wood, structurally braced 3 ways with steel angles and struts. • Freedom from warping and binding. • Key coverings in any wood or simulated ivory. Normally supplied in roosewood for naturals, maple for sharps; pedal in teak and maple. • All silver underkey contacts or optional photocptic sensors to eliminate all contacts.

STOP CONTROLS AND PISTONS — • Choice of vertical rocking tablets or drawknobs. • Pistons are ultra-reliable; sealed computer-type magnetic reed switches.

COMBINATION ACTIONS — • Choice of Pre-wired (poor-man’s) Hold-and-Set, Setter Board, Capture or Data Card types (in that order of cost). • All are solid-state.

COUPLING & SWITCHING SYSTEMS — • Only solid-state equipment used. • Only one contact per key, one contact per stop, one contact per coupler. • All borrow, unification and pedal switches are solid-state; relays are solid-state.

REBUILD — Specialists in rebuilding Skinner and Casavant consoles.

Leather

• Natural (undyed) pneumatic leather (Grade 1). • Havana (brown) pneumatic leather (Grade 1) strong, medium, thin, or extra thin. • Alum Valve or Gusset leather. • Alum Bellowes (Rib) Leather. • Cabretta • Zickeliedor (super tough). • Simili (Zephyr Skin).

Magnet Wire

New super-tough “solderable” magnet wire with polyurethane insulation nylon overcoated, in use for years by the military and computer equipment manufacturers, is now available for organs. This wire is far more reliable, abrasion and humidity resistant than either double-cotton-covered or PVC covered wire yet it solders easily WITHOUT SANDING OR SCRAPING THE INSULATION! The outside diameter is less than the same gauge PVC and similar to D.C.C. 100% copper.

Windches & Schwimmers

Pitman (Skinner style), slider (cone channel) and direct-electric (co-axial) windches can be made to order. Slider chests available with mechanical or electric action for either or both keys and stops. Solid-state relays and controls can also be provided for all electric chests. Slider and direct-electric chests can be provided with built-in “schwimmer” pressure regulators; separate “schwimmer-balgs” can also be made to order in any size for any pressure using a curtain-valve type control.

European-Style Pipes

Pipes from 4’ speaking length up of any alloy are made from planed metal (when ordered) and prepared for easy voicing. Voicing services available. WE ALSO REBUILD OR RESCALE OLD PIPES — new languard, altered mouth widths, etc. Send us your requirements. Cost is approximately 2/3 that of new pipes for complete rebuilding.

THE ELLEN DYNAMIC TRANSMISSION SYSTEM

A new form of electrical transmission eliminating the need for the console-to-organ multicore cable of old.

The system comprises standardised units programmed to customers' requirements for stops, couplers, and/or unification. Alterations can be made at any time by re-programming.

Receiver for 15 ranks, 56 unit stops and auxiliary controls. Unit size: height 18in, length 24in, width 13in.

Also now available: a capture Piston System on two separate channels.

For prices please send full specification and details to:

NEW PRODUCTS (Write for Catalog Sheets)

DYNATREM™ TREMOLO UNIT (PATENT PENDING)
This motor driven tremolo device can be used with almost any reservoir systems (including Schwimmers) to produce a tremolo of any desired depth and speed. It uses no air and eliminates the need for weights on the reservoir. This allows use of a smaller blower and improves the steadiness of wind supply.

NEW “PLUG-IN” MAIN CABLES AND JUNCTION SYSTEM
These extremely small diameter main cables come with attached connectors (small enough to go through conduits) that plug on to special low cost junction boards for keys and stops, etc. PETERSON DUO-SET COMBINATION ACTIONS can be pre-wired to plug on to stop junction boards, and a convenient method is provided on the stop junction board itself for wiring and adjustment of cresendo pedal sequence. This concept permits “factory wiring” of almost your complete console.
